Vestibular Courses will be implementing COVID event guidelines throughout the course.

Vestibular Rehabilitation

2 Day Introductory Course

Presented by:

Natalie Rando-Orr, Assistant Professor Bond University (Neurology)

Leia Barnes, APA Titled Neurological Physiotherapist/Advanced

Physiotherapist (Vestibular)

2-Day Introductory Course

This course is a two-day event aiming to introduce physiotherapists to common vestibular disorders such as BPPV, vestibular neuritis/labyrinthitis, Ménière's Disease, Bilateral Vestibular Hypofunction, Migraine Associated Dizziness, and central vestibular pathologies.

By having practical components and video examples, the objective of this course is to equip delegates with the knowledge and skills to take a thorough history of the dizzy patient, perform a comprehensive objective examination and develop an up-to-date evidence-based management plan.

Course outline:

- Vestibular assessment and differential diagnosis
- Unilateral vestibular pathology: recovery mechanisms and implications for treatment
- Audiology Testing
- Anatomy and Pathophysiology of BPPV
- Assessment and Management of BPPV
- Introduction to Central Vestibular Disorders

Pre-readings will be supplied via Dropbox prior to the course. Lecture and practical notes will be supplied in a manual on the day.

REGISTRATION PROCESS:

All applicants will be registered on a first come, first served basis. Due to the practical component of this course, numbers are limited.

Please follow the link below or scan the QR code to register.
